LINK LIGHT RAIL

March 30, 2009

Blue Noise Wall Surrounding Beacon Hill Station Site to be Removed

As early as **Tuesday, March 31st**, Sound Transit's contractor, Obayashi Corporation will begin removal of the blue noise wall that surrounds the site of the Beacon Hill light rail station.

The first phase will include the removal of the blue noise wall starting with the northernmost sections along Beacon Ave S., 17th Ave S and S. Lander Street. (See map on reverse). The second phase will include removing the remainder of the blue noise wall on the south end of the property. The second phase is currently scheduled for the middle of May to early June. Once the blue noise wall is down, the site will be secured by a chain link fence. As a result, residents may experience increased noise from construction activities.

Pedestrians should use caution while using the sidewalk on the eastside of Beacon Ave (that borders the blue noise wall) as pedestrian access will be moved safely around the work site.

The noisier activities (such as jack-hammering) will take place during the day, and will be restricted to the hours of 7:00 am to 5:00pm.

Construction activities expected between the hours of 5:00 pm and 10:00 pm include the installation of brick veneer, site and roadway (S. Lander St.) restoration, plaza paving and landscaping.

No surface-level construction activity is expected between 10:00 pm and 7:00 am.

Sound Transit will continue to monitor construction noise levels and any activity whose noise is outside of acceptable limits will be restricted to the hours between 7:00 am and 5:00 pm.

If you have any construction-related concerns, please call Sound Transit's construction hotline at 1-(888) 298-2395.

For More Information

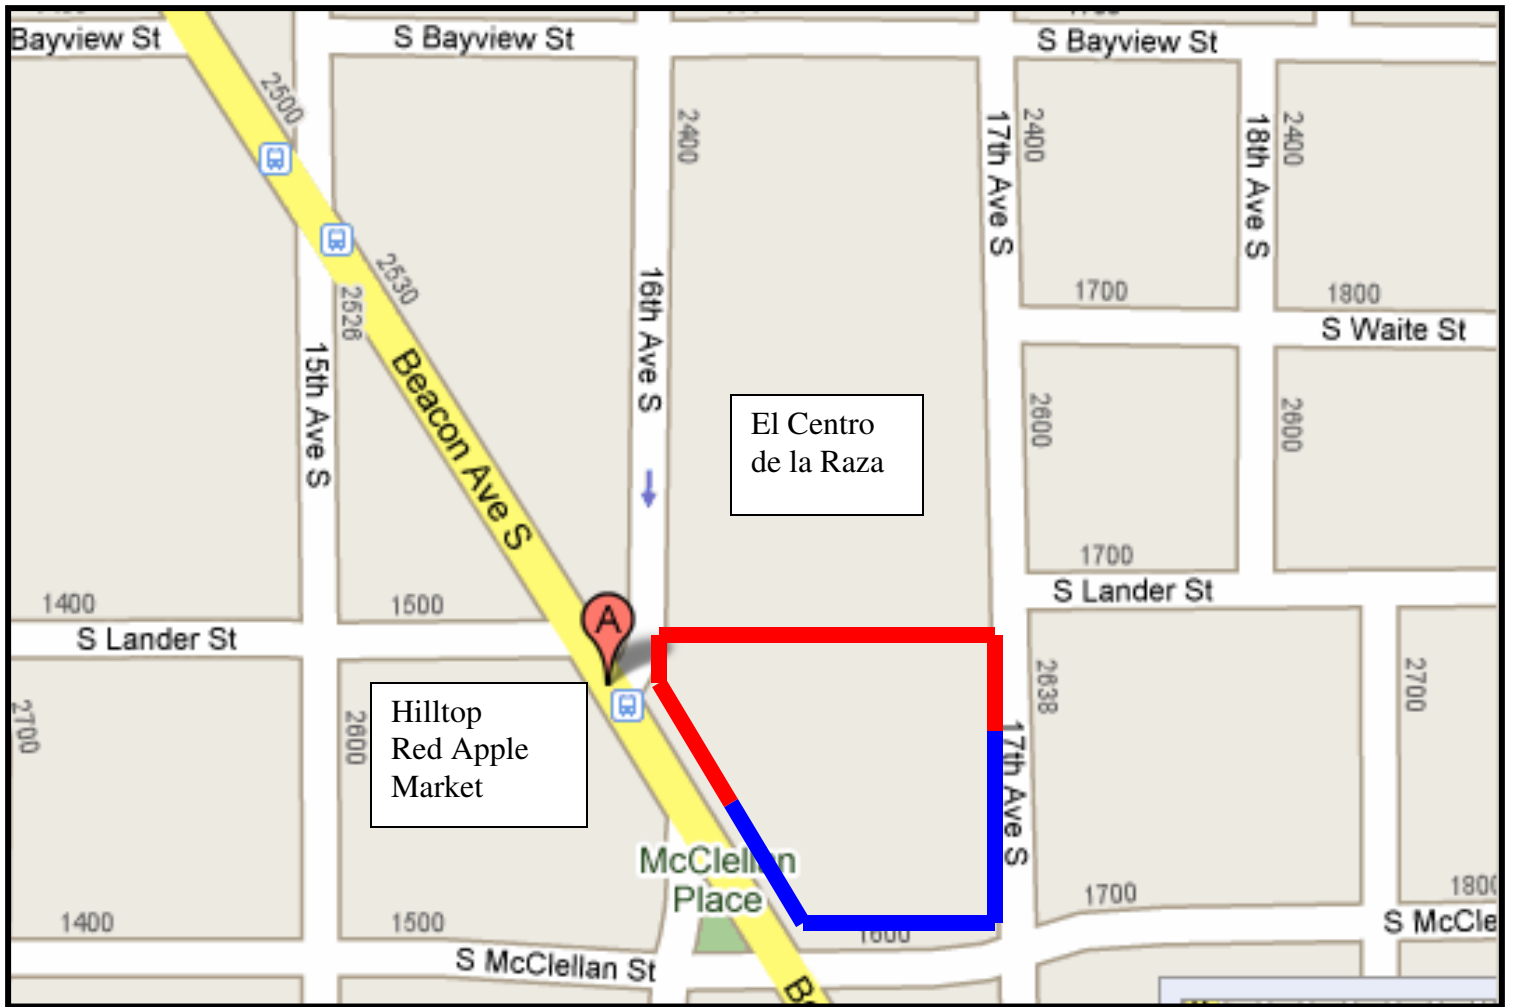

For more information about the Beacon Hill Tunnel and Station, please contact Jennifer Lemus at 206.398.5314 or e-mail at Jennifer.Lemus@soundtransit.org.
