2Q 2024 ALM Overview

Key Items

The investment portfolio remains conservatively positioned and has weathered the market volatility well. The portfolio continues to selectively add high-quality municipal, agency, and corporate securities when the market provides an attractive entry point. A key focus continues to be maintaining liquidity in support of the realigned plan. Sound Transit continuously monitors the markets and seeks opportunities to decrease costs and create financial capacity. Actions are proposed if they are financially beneficial to the agency and its program as a whole. The Agency invested another \$10 million to support ST's community impact program in Q2 and anticipates contributing another \$75 million in Q3.

Market Environment

Market yields in Q2 rose early in the quarter on April's strong jobs data and March's CPI print before partially retreating as the data evolved into slowing inflation and softer employment, leading fixed-income investors to adjust their expectations of the Fed funds market over the near future. Entering Q2, market participants expected the Fed to lower rates at their June meeting, and if not, certainly at their July meeting. The meetings in June and July passed without the Fed acting to lower rates. Inflation proved just sticky enough to reduce expectations of the extent and the timing of lower rates. The economic environment continued to show more resilience to higher rates than expected, which added to the uncertainty of when the Fed would move to lower rates and how long the action to lower rates would last. The bellwether two-year Treasury note increased 13 basis points in yield from Q1 to Q2, closing Q2 with a yield of 4.75%.

Actual Borrowing Rate versus Investment Rate

Current Tax-Exempt Borrowing Rates

- Current 30 year fixed at 4.31%
- Current variable rate at 4.25%. Q4 SIFMA avg of 3.64% + LOC Cost of 0.55% + Rmktg Fee of 0.06%

Investment Strategy

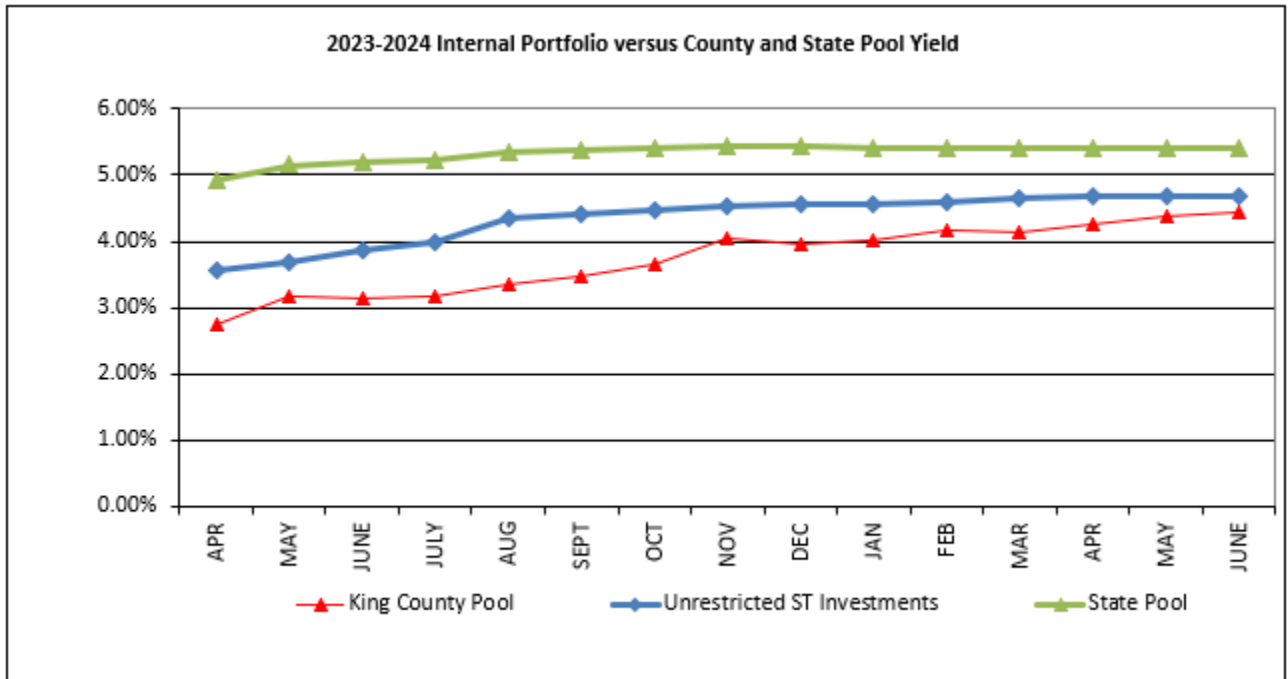

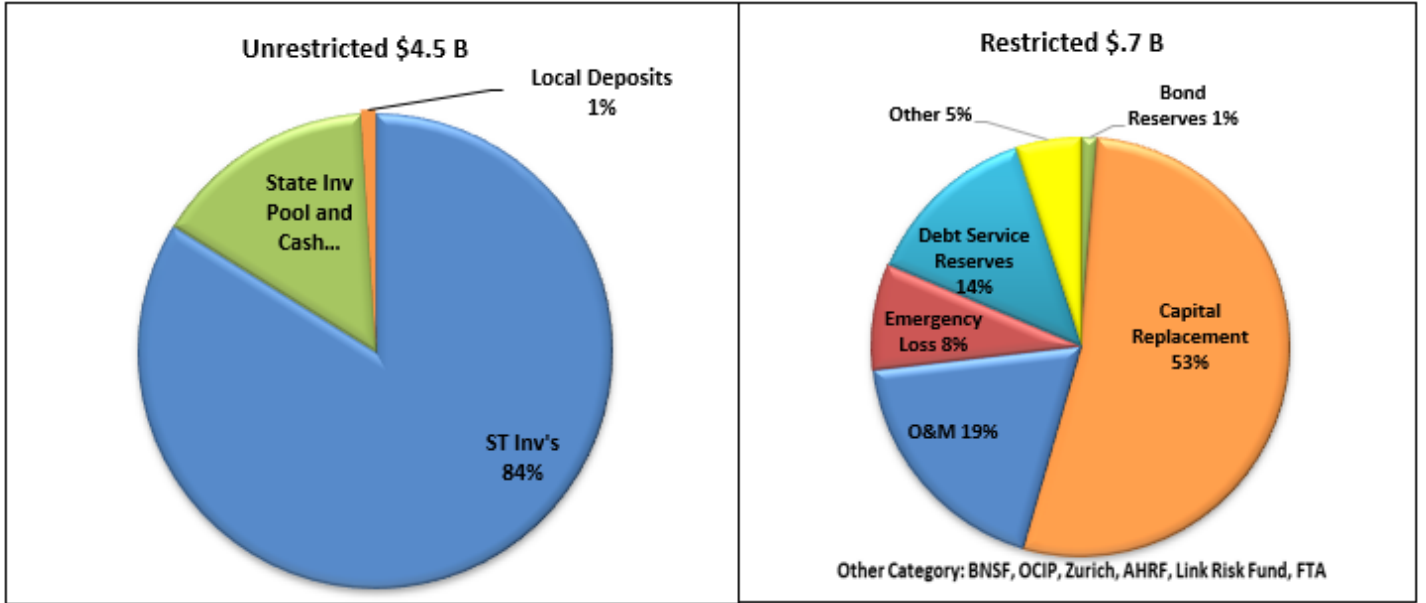

The investment portfolios are tactically invested to manage cash flows and duration to navigate the portfolio through the volatile markets. US Treasury securities are being overweighted due to the relative valuations. The Agency continues to prioritize liquidity to provide flexibility to the realigned plan.

2Q 2024 Debt Overview

Debt Strategy

Sound Transit considers the diversification of its long-term liabilities in the context of its future borrowing needs. The Agency utilizes various financial instruments to fund the long-range financial plan. The Agency continues to take action in response to Board's direction to seek opportunities to reduce cost and expand financial capacity.

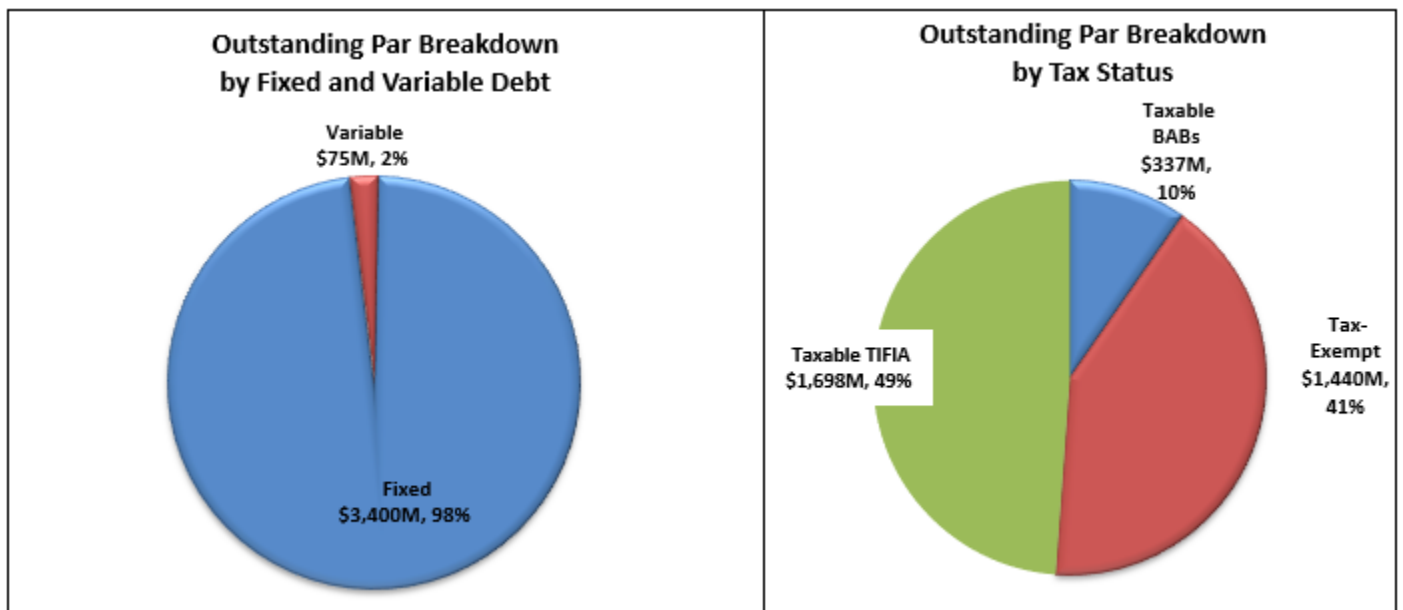

Debt Summary

- The 20-year MMD ended the quarter at 3.44%, 8 basis points higher than the March 31, 2024 rate.
- The average Q1 2024 spread between the 20-year AAA MMD and the 20-year A MMD was 41 basis points as of 06/30/24, which is 1 basis point higher than what was measured on 03/31/24.

Glossary of Debt and Investment Terms

Basis Point – The smallest measure used in quoting yields on bonds and notes. One basis point is 0.01% of yield. For example, a bond's yield that changed from 3.50% to 3.00% would be said to have moved 50 basis points.

Benchmark - A bond whose terms are used for comparison with other bonds of similar maturity. The global financial market typically looks to U.S Treasury securities as benchmarks.

BNSF Escrow – Collateral pursuant to the Sound Transit / Amtrak / BNSF lease-sub-lease dated September 2000.

Book Value – The amount at which an asset is carried on the books of the owner. The book value of an asset does not necessarily have a significant relationship to the market value of the security.

Duration - The weighted maturity of a fixed-income investment's cash flows, used in the estimation of the price sensitivity of fixed-income securities for a given change in interest rates.

Federal Funds Rate – The rate of interest at which Federal Funds are traded between banks. Federal Funds are excess reserves held by banks that desire to invest or lend them to banks needing reserves. The particular rate is heavily influenced through the open market operations of the Federal Reserve Board. Also referred to as the “Fed Funds rate.”

General Obligation Bond (GO) - A municipal bond secured by the pledge of the issuer's full faith and credit, and backed by their taxing authority.

Link Risk Fund – Funded by Sound Transit to pay certain claims related to the operation of Central Link.

Liquidity – The ease and speed with which an asset can be converted into cash without a substantial loss in value.

Local Government Investment Pool (LGIP) – The aggregate of all funds from political subdivisions that are placed in the custody of the State Treasurer for investment.

Market Price - For securities traded through an exchange, the last reported price at which a security was sold; for securities traded "over-the-counter," the current price of the security in the market.

Par Value – The nominal or face value of a debt security; that is, the value at maturity.

Performance - An investment's return (usually total return), compared to a benchmark that is comparable to the risk level or investment objectives of the investment.

SIFMA - The Securities Industry and Financial Markets Association Municipal Swap Index is a 7-day high-grade market index comprised of tax-exempt Variable Rate Demand Obligations (VRDOs) with certain characteristics. The Index is calculated and published by Bloomberg.

TIFIA Loan – Transportation Infrastructure Finance and Innovation Act loan with the United States Department of Transportation, acting by and through the Federal Highway Administrator. TIFIA loans are used to complement other sources of debt, resulting in a lower cost of funding than would be available in the capital markets.

Total Return - Investment performance measure over a stated time period which includes coupon interest, interest on interest, and any realized and unrealized gains or losses.

OCIP Collateral – Pledged collateral for the Owner Controlled Insurance Program for University Link and Northgate Link.
